

# **Bridging the gaps: translating gut health research into practice**

## **Draft symposium programme**

Introduction

### **Session 1**

#### **Evolving concepts**

Nutrients and immune responses

Probiotics and prebiotics: progress and future direction for intestinal health

Enzymes: beyond just nutrient digestibility

### **Session 2**

#### **On farm**

Antimicrobial strategies in pig production: progress and future direction

How a nutritionist applies research on farm

### **Session 3**

#### **Moving forward**

Gut health studies in poultry: interpretation and application

Gut health studies in pigs: interpretation and application

Designing host-microbiome studies to truly advance understanding

Regulatory landscape in the microbiome space

Group Discussion/roundtable
