

Wishing you a Merry Christmas

and a prosperous 2020!

*We thank our clients and friends for their support
in 2019.*

2019 HIGHLIGHTS

- *Supported clients in the delivery of their nutrition-health strategies.*
- *Established annual Gut Health Meeting in the UK.*
- *Articles published in leading peer-reviewed scientific journals.*
- *Investigated latest roles for the gut microbiome in vaccine responses & respiratory diseases.*
- *Numerous countries visited to support clients & attend leading conferences (IPPE, IHSIG Rome & Gut Health Meeting, St. Louis).*

Supporting clients

We have supported clients in investigating, developing and applying additives to promote animal health & productivity. We have shared insights on the latest host-microbiome developments and supported clients at customer events & in providing gut health training.

Gut Health Meeting, UK

We established a new Gut Health Meeting in Bath, UK, in September, which was attended by over 70 delegates from the UK, Europe & N. America. Many thanks to our sponsors and see you in 2020!

Published articles

We have published various articles in the last year:

- Host-microbe interactions and gut health in poultry - focus on innate responses, *Microorganisms* (<https://doi.org/10.3390/microorganisms7050139>)
- Deciphering desirable immune responses from disease models with resistant and susceptible chickens, *Poultry Science* (<https://doi.org/10.3382/ps/pey535>)
- The role of the gut microbiome in shaping the immune system of chickens, *Veterinary Immunology & Immunopathology* (<https://doi.org/10.1016/j.vetimm.2018.10.002>)

Latest developments

We have a keen interest in identifying and sharing (usually via LinkedIn!) the latest developments in the microbiome space. Particular interests this year include the potential of the gut microbiome to influence vaccine responses & susceptibility to respiratory pathogens.

Getting out & about!

We have visited numerous countries to support clients, as well as to attend key conferences. Various trips are scheduled for 2020, while seeking to consider our environmental impact!
